

Milo's Canal Adventure with Rifat

Milo went on an exciting trip with Rifat to the Leeds/ Liverpool Canal and **explored** the area around the swing road bridge.

He enjoyed walking along the canal and looking at the water flowing underneath the bridge. He stopped to **listen** to the sounds around him, including the gentle sound of the water and the birds singing nearby.

Milo explored the swing road bridge by walking across it and looking underneath. He **imagined** that a friendly troll might live under the bridge, just like in the Trip Trap, Trip Trap activity. He **watched** the water carefully and looked out for fish and other creatures.

Milo also enjoyed **collecting** natural objects, such as leaves and small sticks. He played a game like pooh-sticks by dropping a stick into the water and watching it travel underneath the bridge. He **wondered** which stick would reach the other side first.

It was so much fun!

#41 Water Feature
